

Creative Workshops at EcoDysgu

At EcoDysgu we believe in a holistic approach to education and learning. Visitors to EcoDysgu find themselves breathing in the freedom of 42 acres of ancient woodland, pasture and workshop space. The participants will draw on their creativity and be involved with a process that will open them up to themselves, with an emphasis on the environment, ecological, cultural and emotional issues. Our process achieves 'well being' and lasting change.

Let your spirit soar, come and be inspired by nature and community creativity

Our creative workshops all include a complementary therapy session with one of our experienced therapists, such as Indian Head Massage, Reiki, Hands on Healing or Reflexology. These therapies are all undertaken in the middle of the workshops, everyone is enthusiastic to take part. The workshops themselves are many and varied from making a bench or table, to willow weaving, woodcarving, spinning, gardening or work in our 16 acres of woodland.

By booking this unique and inspiring venue you will also be supporting a not for profit social enterprise, so why not call us now we always strive to meet your needs.

Prices
